

MagnetVision 4K

Revolutionizing the MRI Experience

Stunning Image Quality For Any MRI Suite

The MagnetVision cinema technology brings images to life with photographic realism that transports patients into an immersive world of entertainment, easing anxiety and boredom.

MagnetVision's stunning LED system will delight your patients introducing them to a virtual world they will never want to leave! By creating the ultimate entertainment system in your MRI facility, you'll eliminate appointment cancellations and patient sedation while creating a competitive advantage for your facility!

See the future of patient comfort for the MRI environment with Resonance Technology today.

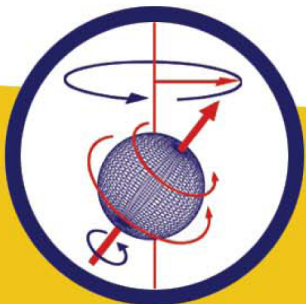

Patient Comfort is the Key

Studies reveal that about 12% of MRI examinations are cancelled because of patient anxiety surrounding long, confining imaging procedures. Stay miles ahead of the competition with this leading edge technology that puts patient comfort on the big screen with a high resolution!

MagnetVision Features Include:

- Size: 32" diagonally
- Minimum Resolution: 640 x 480
- Maximum Resolution: 4096 x 2160
- MRI-Safe device
- 2D compatible viewing screen
- Easy patient set up
